1. All traffic signal backplates shall have a 2-inch retroreflective adhesive sheeting border on the entire outer perimeter of the front side of the backplate.
2. Retroreflective sheeting shall be fluorescent yellow, ASTM D4956-13 Type XI or better.
3. The retroreflective sheeting border shall have a minimum of 0.5" clearance from all louvers. No retroreflective sheeting shall be placed over any louvered area. Retroreflective sheeting border shall be installed by the manufacturer, and modifications shall not be made by the contractor.
4. The back plate with retroreflective sheeting border shall be from the same manufacturer as the signal head assembly. The complete head assembly, including the backplate, shall be capable of withstanding winds of 90 MPH without damage or separation of any parts from the signal head assembly.

Agency Approved

Paint: Flat Black

Shown 5 Section, 12" Signal Head backplate without elevator plumbizer.

Notes:

2" Yellow retroreflective border line adhesive sheeting

1/2" clearance (Typ. Min.)

2" R.
