SECTION 683

VIDEO OPTICAL TRANSCIEVER WITH BI-DIRECTIONAL DATA CHANNEL

DESCRIPTION

683.01.01 GENERAL: The Contractor shall furnish the designated quantity of Video Optical Transceiver (VOTR) pairs that interface the Closed Circuit Television (CCTV) cameras with the central control system over Single Mode Fiber Optic (SMFO) cable. Each VOTR pair delivered shall provide 1 unidirectional National Television Standards Committee (NTSC) color video channel from the CCTV field location to another designated point and 1 bi-directional data channel between both locations. There will be a designated video transmitter and a video receiver. The devices shall be International Fiber Systems (IFS) Model #VT4930WDM and IFS Model #VR4930WDM, or equivalent, as approved by the Freeway & Arterial System of Transportation (FAST) Manager Director, or designee.

This specification is for equipment only, no installation, to be delivered to the FAST Traffic Management Center (TMC) for testing and approval prior to final acceptance. No partial shipments will be accepted. All equipment supplied on this project will be delivered during a single delivery, and shall be labeled clearly with the project and location designation.

The VOTR will be able to be connected to each end of one single mode optical fiber with Straight Tip (ST) connections to establish a point-to-point communication topology for the locations shown on the drawings. VOTR’s designed for mounting in card cages shall be hot-swappable.

All equipment selection shall be approved by the FAST Manager Director, or designee.

MATERIALS/EQUIPMENT

683.02.01 GENERAL: All equipment supplied will have a full manufacturer’s warranty.

683.02.02 MECHANICAL: The VOTR shall be a surface mount device (field), or rack-mount (hub) configurations, when specified. The field mounted VOTR shall be enclosed in corrosion resistant housing that protects the internal circuitry from the environment. The housing shall be provided with suitable holes for mounting to a flat surface.

When it is specified, the rack-mounted VOTR shall occupy no more than 4 Rack Units (RU) (7 inches) of space and be of the same manufacturer and compatible with the 19 inch rack-mountable card cage. The rack-mounted VOTR’s shall obtain all necessary power from the card cage assembly without the use of external power cables.

All VOTR’s shall have external, silk screened, labeling of: the device type, model number, part number, serial number, Light Emitting Diode (LED) status indicators, connector functions, and manufacturer on the front panel and/or the housing. Internal labeling shall be provided to clearly identify all dipswitches and jumper positions.

The VOTR shall have LED status indicators for presence of video carrier, input power, and data transmission.

683.02.03 OPTICAL:

(a) Laser both directions (wavelength 1310/1550 nm) over 1 single mode fiber.

(b) Link loss budget of 23dB (minimum).
(c) ST Connectors only.
(d) Minimum connection of 0.67 meters (2 feet) of cable with no optical attenuation.

683.02.04 DATA:

(a) Bi-directional data communications (simplex and full duplex operating modes).
(b) Selectable Electronic Industry Association (EIA)-232, EIA-422, or 2-wire EIA-485 interfaces.
(c) Data rates from DC to 100kbps.
(d) Bit error rate of 10⁻⁹.
(e) Data receiver output (EIA-232/422) defaults to a "low" state in the event of a fiber break or failed data transmitter.

683.02.05 VIDEO:

(a) NTSC Color, compliant with EINTIA-250-C for Medium-Haul Transmission and EIA-170 Video Standards.
(b) Bandwidth range of 5Hz to 6.5MHz.
(c) Signal-to-Noise Ratio > 60\text{dB} dB.
(d) Differential Gain < 3 percent.
(e) Differential Phase < 3 degrees.
(f) Tilt < 1 percent.
(g) BNC Connection.

683.02.06 POWER: The VOTR shall operate to specification when supplied with 120 ± 15VAC, 60 ± 3 Hz single-phase power. The use of transformers to reduce the 120 VAC prime power input to a lower level used by the VOTR is acceptable. This transformer shall be supplied if necessary.

683.02.07 ENVIRONMENTAL: The VOTR shall be designed to operate from minus 40 (−40 °C) degrees Celsius (−40 °F) to +74 °C (165 °F) with no cooling airflow, 0-95 percent relative humidity, non-condensing.

683.02.08 NINETEEN-(19)-INCH RACK MOUNTED CARD CAGE: When required at a hub location, the VOTR shall be able to be installed in a 19-inch rack mounted card cage. The cage height shall not exceed 4 RU. The cage shall contain a fault tolerant power converter compatible with VOTR module power requirements. The cage shall include provisions for interconnecting cabling and be designed to accommodate a minimum of seven VOTR modules that shall be easily mountable and removable from the cage. When installed in the cage, the VOTR modules shall be securable. The module's maintenance indications shall not
be distributed after being mounted in the drawer. A failure of 1 VOTR module shall not impact the operation of other VOTR modules installed within rack mounted cage.

**683.02.09 FIBER OPTIC JUMPER CABLES:** 4 fiber optic jumper cables shall be delivered with each transceiver supplied, and the fiber optic jumper cables shall meet the following requirements:

(a) 250 μm buffering of each fiber.

(b) 900 μm buffering of each fiber applied after the initial 250 μm buffering.

(c) Maximum factory measured insertion loss of 0.5dB per EIA/Telecommunications Industry Association (TIA) 455-171.

(d) Less than 0.2dB loss when subjected to EIA/TIA-455-1B, 300 cycles, 0.5 kg.

(e) Aramid yarn strength member.

(f) Rugged 3 millimeters (0.12 inch) (approximate) Polyvinyl Chloride (PVC) sheathing.

(g) Minimum bend radius of 320 millimeters (12 inches) following installation, 640 millimeters (25 inches) during installation.

(h) Minimum tensile strength of 444 N (100 lbs.).

(i) And ST connectors that are factory terminated with strain relief.

**CONSTRUCTION**

**683.03.01 GENERAL:** Though no physical construction is part of this deliverable, the Contractor shall furnish all mounting hardware (i.e., machine screws, nuts, locking washers) to install the VOTR’s securely in the cabinet. Mounting methods using tape, Velcro, and sticky back material will not be permitted. All necessary power adapters and cabling needed to obtain power from the power distribution assembly shall be provided and secured.

As noted above, the Contractor shall also supply the 1 simplex fiber optic jumper cable needed to be installed from the field termination panel (field mounted) or from the fiber optic patch panel (rack mounted) to the single optical inputs of the VOTR.

All VOTR’s shall be provided with protective covers on all optical connectors. The Contractor shall ensure that the protective covers remain on the optical connectors at all times when each connector is not being used.

**METHOD OF MEASUREMENT**

**683.04.01 MEASUREMENT:** The quantity of Shelf Mounted VOTR’s with Cable will be measured for payment per each delivered, complete and operational, and successfully tested.

The quantity of rack mounted VOTR’s with cable will be measured for payment per each delivered, complete and operational, and successfully tested.

The quantity of 19 inch rack mounted card cage will be measured for payment per each delivered, complete and operational, and successfully tested.

Mounting hardware, power conversion hardware (if required), and the VOTR rack mountable card cage in the hub is incidental to the VOTR bid item and will not be measured or paid separately.

The equipment delivered will be tentatively accepted pending testing by the FAST Manager Director, or designee. Only after a series of bench tests of the devices will the final acceptance be made and documented.
BASIS OF PAYMENT

683.05.01 PAYMENT: The accepted quantity of Shelf Mounted VOTR’s with cable delivered complete will be paid for at the contract unit price bid per each, which price shall be full compensation for the VOTR(s), SMFO cable, housing(s), 4 fiber optic jumper cables per video transceiver, hardware, 1 simplex fiber optic jumper cable per video transceiver, warranty, and delivery to the FAST Manager Director or designee.

The accepted quantity of rack mounted VOTR’s with cable delivered complete will be paid for at the contract unit price bid per each, which price shall be full compensation for the VOTR(s), SMFO cable, 4 fiber optic jumper cables per video transceiver, hardware, 1 simplex fiber optic jumper cable per video transceiver, warranty, and delivery to the FAST Manager Director or designee.

The accepted quantity of 19 inch rack mounted card cage delivered complete will be paid for at the contract unit price bid per each, which price shall be full compensation for the rack mounted card cage, hardware, warranty, and delivery to the FAST Manager Director or designee.

Payment will be made under:
